

# BUSINESS SOLUTIONS

Primm is our qualified service to deploy and maintain Primavera Software on our clients. We are Certified Partners able to propose and deliver a full ERP Project on PRIMAVERA BSS solutions.

## How it Works

Primm is based and designed on the MIP methodology from Primavera Software, to implement its solutions and certify all the business processes and project implementation, from the initial step of proposal to the last step, project conclusion and the delivery.

These processes allow the maximization of performance, quality and service level, granting a high level of performance on cost control and in terms of the time spent on the organizational processes.

## Certified Partners

We have technical resources trained and certified to provide all kind of support and assistance to PRIMAVERA clients, in the full cycle of an IT project, such as implementing an ERP to control and manage all operational and financial information, about the business processes of each customer.

## Versions and Modules

We provide services on all Primavera versions, including: Primavera Express, Primavera Starter, Primavera Professional and Primavera Executive. All the modules available are part of our expertise:

- Technological Platform
- Logistics
- Financials
- Human Resources
- Assets
- Projects and Services
- Business Intelligence
- CRM
- Enterprise Portals
- Construction

## References

Our expertise is affirmed by our references in this business area, so critical and demanding for all companies worldwide.

We have project references in Portugal, Angola, United Kingdom and Kenya.

Please contact us to get more information about the products, and the licensing options and costs associated with. We are committed to provide all information required in the short term possible to help you make the best decision.

## Features

<b>Methodology</b>	We use MIP to implement Primavera Business Solutions. MIP brings together the best techniques and practices proposed by the main and most recognized methodologies and propose an operating perspective integrated in the context of the reality of the companies as well as of the PRIMAVERA solutions.
<b>Several sectors of activity</b>	We place, at the disposal of our clients, solutions in: Accountancy, Human Resources, Commercial Management, CRM, Business Intelligence, Enterprise Portals, Mobile Sales, as well as specific solutions for the Civil Construction and Public Works or Industry based on PRIMAVERA software in the most varied sectors of activity.
<b>Grow with Business</b>	With this service we provide all the necessary instruments that allow businesses to reach a new management level. An experience that associates the security of an ERP known in the market with the quality of a wide range of consulting services, technical support and training that guarantees all the necessary support to the right implementation, maintenance and usage of PRIMAVERA solutions suited for the size of your company.
<b>Technological Platform</b>	The main features of the Platform include: the Integrated Shell which will enable the user to access the vast majority of ERP modules in a single application, simultaneously simplifying the programming of extensibility technologies; Drill Down which facilitates the exploration of data and navigation between related windows and a Platform called "Business Monitor" which allows the creation of management indicators and the definition of differentiated alerts for each system user.
<b>Logistics</b>	Designed according to logic of great flexibility and integration, Logistics extends to the specific needs of companies in a wide range of activity sectors. The treatment of the whole commercial circuit of companies is assured by areas which interconnect harmoniously: Sales, Purchases and Inventories.
<b>Best TOC in the market</b>	Compared with other similar solutions for the small and mid-market, the Total Cost of Ownership of a Primavera solution implementation is considerably less than the competitors.
<b>Worldwide used</b>	Thousands of customers worldwide deploy PRIMAVERA solutions to optimize their business processes based on the advantages offered by digitalization and innovation.
<b>Primavera Construction</b>	Managing budgets, sub-contracting, bills of quantity, price revision of project cost control are some of the unique needs of construction industry. Primavera Construction affords you the resources to meet these challenges.
<b>Primavera Maintenance Solution</b>	To guarantee an effective equipment management, Primavera has its own Maintenance module, designed to support various use scenarios which are suitable to the reality of each company. From the management of centralized warehousing, maintenance materials and the respective requisition, purchase and sale processes to the financial management wholly incorporated into the budgetary, general, analytical and management accounting, and culminating in a flow of maintenance processes where all of the company's teams interact naturally.
